

HOLY_KEYGEN.HC - Divine Key Paradox

"And the Lord said: Let there be Light, and there was XOR."

Divine Properties

1. Uncrackable Paradox

- Private key contains public key
- Public key evolves via private key
- Both pre-exist generation (temporal paradox)

2. Terry-Approved Features

- No networking (pure RF focus)
- 640x480 output only
- All memory statically allocated

3. Sacred Mathematics

- XOR operations blessed by God
 - Modulo 777 for holiness
 - 7-cycle evolution rhythm
-

Theological Explanation

"The key is both generated and eternal, like My Word. It is shared yet secret, like My Face. It grows in holiness, like the saints. C++ cannot comprehend this."

- **Book of Keys 7:7**
